

10.750 ARTICOLI DI RARA BELLEZZA

- *Creati da **RIK-FER** in 39 anni di duro lavoro*
- *Studiati con grande professionalità*
- *Realizzati con amore per soddisfare i nostri clienti più esigenti*
- *Commercializzati in oltre 50 nazioni*
- *Settori:*
 - *Ferro Forgiato*
 - *Arredo*
 - *Acciaio Inox*

- *10.750 items of uncommon beauty, designed by **RIK-FER** within 39 Years of hard work.*
- *Developed with high professionalism.*
- *Created with love in order to meet requirements of our demanding customers.*
- *Marketed in over 50 Nations worldwide*
- *Fields:*
 - *Artistic wrought iron*
 - *Furniture*
 - *Stainless steel*

- Azienda leader nel mercato italiano con forte espansione all'estero.
- Conosciuta per la qualità e la cura artigianale dei propri prodotti.
- **RIK-FER** è tra le poche aziende che offrono la possibilità di personalizzare propri disegni o di creare repliche di elementi storici sulla base di un campione.
- Le nostre creazioni sono riconosciute in tutto il mondo
- Leading company in the Italian market with a strong expanding trend into foreign markets.
- Stands out for quality and accurate handicraft with which its products are made.
- **RIK-FER** is one of the few companies that can customize your own designs or create reproductions of historical elements on the base of a sample.
- Our exclusive creations are recognized all over the world

ELEMENTI IN FERRO FORGIATO PER CANCELLI, RINGHIERE E INFERRIATE

ÉLÉMENTS EN FER FORGÉ POUR PORTAILS, RAMPES D'ESCALIER ET GRILLES

BREVE INDICE GENERALE

CONDIZIONI DI VENDITA

Consegna

I termini di consegna da noi indicati si intendono approssimativi e quindi non sono impegnativi. In qualsiasi caso di forza maggiore che impedisca o limiti il normale andamento della produzione i termini si interrompono o si prolungano. La merce viaggia a rischio e pericolo del compratore, anche se venduta franco destino. La consegna si intende effettuata nel momento in cui la merce viene consegnata al vettore o allo spedizioniere. I reclami per merce mancante o danneggiata devono essere fatti immediatamente per iscritto sulla bolla di accompagnamento e controfirmati dal trasportatore. Comunque nessun reclamo potrà essere elevato decorsi 8 giorni dall'arrivo della merce.

Richiesta di rimborso danni dopo aver ultimato il lavoro

Non viene accettata, nel modo più assoluto, la richiesta di rimborso danni senza che la Rik-Fer abbia avuto la possibilità di verificare prima il danno stesso. Non verrà più accettato il comportamento, abbastanza frequente, secondo il quale un presunto danno viene comunicato dopo il lavoro finito e non prima di dare inizio allo stesso, con la scusa che si ha fretta. In questo modo non è possibile verificare da parte nostra l'esistenza dei danni se il materiale è già messo in opera.

Resi merci

Non verrà accettata merce di ritorno se non in porto franco e sempre su autorizzazione scritta della RIK-FER a seguito di "PROPOSTA DI RESO" sottoposta dal cliente. Non vengono accettati resi di materiale manomesso: ruggine, accorciato, forato, piegato, storto, verniciato o zincato. La ditta fornitrice si riserva di addebitare al cliente l'importo forfettario del 10% sull'equivalente valore della merce resa quale partecipazione alla spesa di controllo, immagazzinaggio e ripristino del materiale reso.

Dati tecnici

Le altezze, le sezioni e gli ingombri dei nostri articoli base sono indicativi, pertanto non sono perfettamente uguali alle misure indicate nel catalogo e nemmeno perfettamente uguali fra loro. Resta chiaro, così, che prima dell'uso, alcuni di loro devono essere sistemati. L'azienda si riserva in qualunque momento di apportare alla propria produzione modifiche e/o miglioramenti ritenuti necessari a suo insindacabile giudizio.

Richiesta campione o disegno

Per determinate quantità, l'azienda può eseguire lavori su richiesta però ha bisogno del campione o di un disegno in scala 1:1 con la descrizione delle misure, dei fori, dell'ampiezza degli angoli, delle caratteristiche tecniche precise. Verranno addebitate le ore consumate per la realizzazione di tutti i campioni, qualora gli elementi richiesti non vadano in produzione. Oppure, le campionature saranno messe a pagamento, però saranno detratte nel caso sia aggiudicato e realizzato il lavoro.

Foro competente

Per ogni controversia è competente il solo Foro di Pordenone.

La riproduzione, anche solo parziale, del presente catalogo è severamente vietata. Tutti i diritti sono riservati. Per eventuali errori tipografici nel catalogo e listino la Rik-Fer non si assume nessuna responsabilità.

SELLING TERMS AND CONDITIONS

Delivery

The delivery terms notified by us are approximate and therefore not binding. Any situation of Force Majeure that may hind or limit the normal flow of production can cause delay or break to the delivery terms. The goods will be shipped to buyer's risk and liability, even if delivered to destination. The delivery is considered completed when goods are delivered to the shipping agent or to the carrier. Damaged or missing goods must be immediately notified in writing on the Bill of Lading and countersigned by the carrier. Rik-Fer will not accept any claim raised after 8 days from receipt of goods.

Claim for damages after completing the work

Rik-Fer will absolutely not accept any claim for damages without the possibility of personally checking them. The enough frequent procedure of claiming the supposed damage after completing the project and not before the beginning of the work, due to the urgency of it, will no more be accepted. In this way it is impossible for us to verify the existence of the damages, if material has already been used.

Returning Goods

No return goods will be accepted without written authorization of supplier and upon a "RETURN PROPOSAL" sent by the customer, and freight must be prepaid. Tampered return goods - as rusted, cut, drilled, bended, bent, painted or galvanized - will not be accepted. Supplier reserves its right to apply to customer a 10% forfeit amount on the total value of return goods, as compensation fee for return material checking, stocking, and re-stocking.

Technical details

Heights, sections and volumes of our articles are approximate, thus they are not strictly as details shown on the catalogue nor strictly the same one to the other. It is clear that, before using, some of them must be adapted. Company reserves its right to modify and/or apply improvements to its products whenever necessary upon its unquestionable opinion.

Sample or design request

For determined quantities, the Company can produce also custom made items; this can be done only by support of a master sample or a 1:1 scale drawing of the requested items, with measurements, holes, angle dimensions, precise technical details. All costs due to samples realization will be on customer's charge, in case the customized order will not be confirmed. Otherwise, samples will be charged on the invoice; they will be deducted in case of order confirmation and shipping.

Place of Jurisdiction

In case of dispute the place of jurisdiction is the Court of Pordenone.

Any reproduction, even partial, of this catalogue is strictly prohibited. All rights reserved. Rik-Fer is not liable for inaccuracies, in the catalogue and pricelist, resulting from printing errors.

Il ferro: il più utile tra i metalli e il più diffuso.

Fu usato in tempi remoti, però dopo l'oro e l'argento, il rame ed il piombo: metalli più morbidi che fondono a temperature più basse. Fu infatti necessario scoprire il potere calorico del carbone per fondere il ferro ed apprezzarne tutte le qualità. Ma quando ciò accadde esso divenne il metallo per eccellenza e prese il sopravvento nell'uso comune.

Tanto stimato fu il ferro, da influenzare significativamente anche il linguaggio e su di lui furono coniate frasi e proverbi. Avere "mano" e "braccio di ferro" significò, ed ancora significa, avere forza nel reggere; chi si trova in una "botte di ferro" può sentirsi al sicuro e chi ha "una memoria di ferro" non dimentica nulla di ciò che ha appreso.

L'arte del ferro fece in modo che questo metallo non fosse utilizzato unicamente per la realizzazione di utensili da lavoro, ma lo rese partecipe di quell'ideale di bellezza grazie al quale l'uomo tenta di nobilitare ogni sua produzione, ogni espressione del suo intelletto.

Allora l'uomo prese il ferro, lo arroventò, lo martellò, lo modellò, lo rastremò, lo curvò e l'umile metallo diventò lavoro artistico, Jacopone da Todi così cantò:

"Ferro che rugginoso si mette entro a fucina, se martel poderoso lo batte, ben s'affina...."

La storia del ferro lungo i secoli è la storia di un trionfo e la sua lavorazione ha seguito il cammino dell'arte diventandone una delle più importanti espressioni.

Ma a metà di questo secolo, dopo la Seconda Guerra Mondiale, nell'età della ricostruzione d'Europa, l'uomo non ebbe più tempo per coltivare un'arte così nobile e paziente. Bisognava costruire in poco tempo, adoperando materiali di veloce impiego e, forse di minor costo. Fu il momento del cemento, della plastica, della vetroresina, delle fibre sintetiche. Il ferro venne adoperato solo in verghe dritte, saldate e trattate con una mano di antiruggine.

Da vent'anni a questa parte però, il ferro si sta prendendo la sua rivincita: ringhiere, inferriate, cancelli, lampadari riscoprono la duttilità, la tenacia, la malleabilità, la nobiltà di questo antico compagno dell'uomo.

Anche la ruggine, il nemico storico del ferro, è stata sconfitta dai moderni trattamenti ai quali il metallo è sottoposto, come ad esempio la zincatura a caldo.

L'arte del ferro è rinata a nuovo splendore: l'uomo ha riscoperto il piacere di circondarsi di oggetti che gli consentano di ritrovare emozioni e sentimenti che magari credeva ormai persi per sempre.

E il ferro ha questa capacità di sfidare il tempo, di "rimanere", di collegarsi con una tradizione antica e gloriosa.

Le officine RIK-FER hanno cominciato la loro attività, con modestissime proporzioni, il 10 giugno 1968, proprio quando cominciavano a manifestarsi i primi tiepidi interessi per l'arte del ferro battuto.

In questi lunghi anni di lavoro abbiamo cercato di mostrarci sensibili alle istanze che andavano germogliando, creando migliaia di nuove forme, stimolati dalla richiesta di manufatti da utilizzare nella ristrutturazione di edifici di ogni tempo e dalle nuove tendenze dell'arte moderna. Oggi siamo in 70 addetti a Villotta che lavoriamo in una superficie di 11.000 mq., mentre abbiamo altri 100 lavoratori che operano altrove. Produciamo oggetti in ferro battuto e in acciaio inox che vengono venduti in Italia, in Europa ed in tutto il mondo. I nostri cataloghi, frutto di un lavoro lungo ed ininterrotto durato 38 anni, segnano l'evoluzione e lo sviluppo della nostra ditta, che fin dalla sua fondazione ha provveduto alla diffusione di materiali fotografici ed informativi sui propri articoli più importanti.

Oggi la RIK-FER dispone di 8 testi nei quali vengono presentati i suoi lavori e di un programma di progettazione.

Li elenchiamo in ordine di date di pubblicazione:

Iron: the most useful among metals as well as the most abundant all over the world.

It was used in the distant past, but only after gold, silver, copper and lead, which are softer metals that melt at lower temperatures. Indeed, it was necessary to discover the carbon heating power in order to melt iron and appreciate all its qualities. And when it happened, iron became the metal par excellence and still now it outdoes in daily use. Iron was so evaluated that it deeply affected even the language and still nowadays many sentences and sayings are coined on it: having "iron hand or arm" meant, and still means, to have strenght in holding; the one who is "in a cask of iron" feels safe and the one who has an "iron memory" does not forget about anything. Iron art managed to make this metal used not only for the realization of working tools, but also as part of that beauty ideal, according to which man always tries to dignify every production and every expression of his mind.

Thus, man took iron, made it red-hot, hammered it, moulded it, tapered it, bent it and, since then, this metal, which in the past was considered humble, has become part of an artistic job. In the course of time, history of iron became the history of a triumph: iron manufacturing has kept pace with the path of art, becoming on this way one of its most important expression.

But, after the second world war, during the ages of European reconstruction, man had no more time to cultivate such a noble and painstaking art. It was necessary to build rapidly, with easy-to use and, probably, also cheaper material. That was the time of cement, plastic, fibreglass, synthetic fibres: at that time iron was used only in straight, welded and anti-rust painted bars. In the last twenty years, however, iron has taken its revenge: railings, gratings, gates, chandeliers have been rediscovering the ductility, the toughness, the malleability and the nobility of this ancient friend of man.

Even rust, the traditional enemy of iron, has been defeated by modern treatments to which this metal is subjected like, for instance, hot zin-plating. Art of iron has revived to a new splendour: man has re-discovered the pleasure of being surrounded by objects that allow him to find emotions and feeling that he considered lost forever. And iron has the ability of challenging time, "lasting" and connecting with an antique and glorious tradition.

RIK-FER Workshop started its activities in very modest circumstances on June 10th, 1968, when the first tepid interest for wrought iron art appeared on the market.

During these long years of work we have always tried to be as responsive as possible towards this germinating interest, by creating thousands of new forms. These were stimulated by the request of products to be used in the reconstruction of buildings of all ages and by the new trend of modern art.

Today we dispose of a 70-man work force in our 11000sqm. factory, while other 100 workers are employed in different premises.

We produce wrought iron and stainless steel articles that are sold in Italy as well as in Europe and other Countries worldwide.

Our catalogues, result of 38 years of long and continuous work, mark the evolution and the development of our company, which has been always committed to distributing brochures including photographs and information of our most important articles.

Today RIK-FER presents 8 catalogues in which are resumed its works together with a project program. We list them in order of publication dates:

RIASSUNTIVO GENERALE / ABRIDGED CATALOGUE

Il testo riassume i nostri 7 cataloghi che contengono tutta la nostra produzione:

- 1) CATALOGO GENERALE
- 2) RIK-FER 2000 E 2005
- 3) ARREDO
- 4) ACCIAIO INOX
- 5) CANCELLI DI NUOVA GENERAZIONE
- 6) RIK-FER USA
- 7) RIK-FER PROJECT

Questi testi sono stati realizzati pian piano, nel corso di 38 anni di attività e non sempre gli articoli contenuti sono stati inseriti in maniera sistematica, secondo categorie di appartenenza. Quindi, dopo tanti anni, con un totale di 950 pagine e con un totale di circa 6000 articoli esposti ci troviamo sempre più in difficoltà a "trovarli" uniti in categorie, o famiglie, per poterli confrontare e scegliere.

Abbiamo perciò pensato di aiutare i nostri CLIENTI, e noi stessi, a "riassumere" tutta la nostra produzione in un unico nuovo testo, inserendo tutti i nostri articoli in categorie, osservando in esse una rigorosa progressione numerica dei codici. Una volta trovata nell'indice la categoria a cui appartiene l'articolo cercato, diventa abbastanza facile individuarlo.

Per meglio cercare gli articoli, li abbiamo anche catalogati tutti alla fine in sequenza con accanto la pagina in cui si trovano.

Il catalogo si compone di circa 320 pagine dove vengono illustrati circa 6000 articoli e circa 600 fotografie.

Sotto ogni illustrazione fotografica dei nostri testi vi è anche un elenco degli elementi che la compongono, con riferimento alla pagina nella quale si trovano descritti gli elementi stessi con tutte le loro caratteristiche.

In tal modo pensiamo di aver dato un validissimo aiuto a tutti coloro che si accingono ad utilizzare i nostri componenti: in primo luogo ai fabbri, ma anche agli architetti ed a tutti gli appassionati del fai da te.

Siamo anche sicuri che con oltre 6000 componenti che riportiamo nei nostri cataloghi si possono comporre non solo le 600 illustrazioni fotografiche che proponiamo, ma bensì un numero illimitato, a seconda del gusto e della fantasia di chi utilizzerà i nostri componenti in ferro battuto.

This catalogue resumes our 7 catalogues that represent our whole production:

- 1) GENERAL CATALOGUE
- 2) RIK-FER 2000 AND 2005
- 3) FURNITURE LINE
- 4) STAINLESS STEEL
- 5) NEW GENERATION GATES
- 6) RIK-FER USA
- 7) RIK-FER PROJECT

These books have been realized in various steps, in the course of 38 years of activity the contained articles have not always been inserted in systematic way, according to categories of belongings. Therefore, after many years, with a total of 950 pages and approximately 6000 listed items we found it always more difficult to find them by category, or family, to allow us to confront them and make a choice. For this reason we have thought to help our CUSTOMERS, and ourselves, to reassume all our production in a single book, classifying all our articles in categories, observing a rigorous numerical progression of codes. Once you have identified the category to which the searched item belongs, it becomes very easy to find it.

In order to easier trace articles, at the end of our catalogue we have listed them by code in encreasing numeric order with the referenced pages where you can find them.

Our catalogue is made up of approximately 320 pages whith approximately 6000 illustrated articles and 600 pictures of suggested applications. Under every photographic illustration you will find a directory listing the elements that compose it, again with reference to the page in which they can be found including detailed description of elements with all their characteristics.

In this way we think to have given a valid aid to all those who are about to use our components: in first place to blacksmiths, but also to architects and all "do it yourself" passionates.

We are also sure that with more than 6000 items presented in our catalogues beside the proposed applications shown on the 600 photographic illustrations an endless of other applications can be achieved, depending on taste and fantasy of who will use our wrought iron components.

CATALOGO GENERALE / GENERAL CATALOGUE

È composto da 316 pagine, dove sono riportate con foto a colori n°50 cancelli con altrettanti cancelletti e ringhiere, n°134 scale, n°61 inferriate e n°36 cantonali di ringhiere. Seguono ca. 2700 foto in bianco e nero relative ad articoli che in parte formano le illustrazioni a colori sopracitate. Sotto ad ogni foto vengono descritte le caratteristiche di altezza, larghezza, sezione, peso e vengono espote le eventuali variazioni degli articoli base fotografati.

È un catalogo molto importante.

It is made of 316 pages, where one can find couloured photos of n. 50 gates and railings, n. 134 banisters, n. 61 window grates and n. 36 corner banisters. About 2700 grey scaled photos follow relating to articles that partially compose the above mentioned coloured pictures.

Under every photo there are details referring to height, width, section, weight and possible variations on standard article measures.

This is a very important catalogue to us.

RIK-FER 2000 E 2005 / RIK-FER 2000 AND 2005

Questo testo si compone di due libri ben distinti: RIK-FER 2000 (uscito nell'anno 2000) e RIK-FER 2005 (uscito nell'anno 2005). RIK-FER 2000 é formato di 136 pagine: 64 a colori e 65 in bianco e nero. Nelle 64 a colori vengono illustrate 49 scale a tutta pagina in stile classico e in stile moderno di rara bellezza. Nelle 65 pagine in bianco e nero sono riportati 520 nuovi articoli, alcuni dei quali compongono le 49 pagine precedenti a colori, mentre i rimanenti mettono in risalto le migliori caratteristiche del ferro forgiato in generale. RIK-FER 2005 é formato da 191 pagine: 59 a colori e 133 in bianco e nero. Nelle 59 a colori vengono descritte 95 scale e 3 inferriate in vari stili, con prevalenza dello stile moderno. Nelle 133 in bianco e nero vengono collocati 500 nuovi articoli che formano le 95 scale e le 3 inferriate citate sopra a colori mentre i rimanenti mettono in bella vista le migliori tecniche della lavorazione del ferro battuto moderno.

This catalogue is made up of two different books: RIK-FER 2000 (printed in Year 2000) and RIK-FER 2005 (printed in year 2005). Rik-Fer 2000 consists of 136 pages: 64 colored and 65 in black and white. In the 64 colored pages there are 49 baluster examples illustrated, both in classic and modern style of uncommon beauty. On the following 65 black and white pages we show 520 new articles, some of which compose parts of the 64 previous colored pages, while the remaining items emphasize the best characteristics of our wrought iron. RIK-FER 2005 consists of 191 pages: 59 colored and 133 in black and white. In the first 59 coloured pages we represent 95 stair examples and 3 window gratings in several styles, with prevalence of the modern style. In the following 133 black and white pages there are 500 new articles that in part form the 95 stairs and the 3 window gratings showed before; the remaining items emphasize the best techniques of and working-process of our modern wrought iron.

ARREDO / FURNITURE LINE CATALOGUE

È composto da 57 pagine e 127 articoli di straordinaria bellezza, tutti illustrati da ottime foto a colori: una carrellata di oggetti realizzati con grande cura e maestria adatti ad arredare qualsiasi abitazione.

It is made of 57 pages and 127 articles of extraordinary beauty: all items are shown in beautiful coloured pictures. It represents a view of objects made with masterly skill and care, suited to furnish any kind of residence.

ACCIAIO INOX / STAINLESS STEEL CATALOGUE

È un testo che si propone come "novità" nel campo della lavorazione dell'acciaio inox.

Ha 98 pagine dove vengono riportate 44 foto a colori e 396 foto in bianco e nero relative a 396 articoli base con 848 derivazioni. Quest'ultime, oltre che dalla foto, vengono illustrate da ottimi disegni tridimensionali.

It is a book which represents a novelty in the stainless steel field.

It is composed of 98 pages, 44 of which are coloured while the rest is grey scaled and related to 396 standard items with 848 different variations. These, apart from the photos, are also shown in very good three-dimensional pictures.

I CANCELLI DI NUOVA GENERAZIONE / THE GATES OF NEW GENERATION

Spesso l'uomo sente l'esigenza di celare e al tempo stesso di svelare quanto intende proteggere dalla vista altrui. Per assecondare questo modo di pensare, presentiamo nel catalogo di 62 pagine 11 cancellate e 3 poggiali con delle parti più o meno ampie in lamiera intagliata. Ogni cancellata è seguita da 2 varianti. Seguono 40 nuovi pannelli intagliati al laser, di straordinaria bellezza, adatti ad essere inseriti nei cancelli, cancelletti, ringhiere ed inferriate.

Often people feel the need to hide and at same time to reveal their property and what they intend to protect from other people's sight. In order to favour this way of thinking, we have introduced in over 62 pages of this catalogue 11 gate options and 3 balconies where a more or less ample part is covered with shaped metal sheets. On each of the 11 gate options we propose 2 additional variations. 40 new laser cutted panels and patterns of extraordinary beauty are following, conformed for the use on drive-way gates, gates, railings and window gratings.

RIK-FER USA / RIK-FER USA

In questo Catalogo Rik-Fer USA, con le sue 100 pagine e 75 illustrazioni, sono elencati tutti i nostri articoli che abbiamo ora nel nostro magazzino negli Stati Uniti. Abbiamo stampato il catalogo in lingua Inglese, con le misure Statunitensi, per comodità dei nostri Clienti Americani.

Rik-Fer USA catalogue, with its 100 pages and 75 illustrations, lists all our articles now stocked in the United States.

We have printed this catalogue in English, together with U.S. measurements for the convenience of our american clients.

RIK-FER PROJECT / RIK-FER PROJECT

È un software per la progettazione di cancelli, cancelletti, recinzioni, inferriate, e scale in ferro battuto. Con Rikfer Project avrete la possibilità di scegliere tra un'ampia gamma dei prodotti RIK-FER la soluzione più adatta per soddisfare i vostri Clienti, inoltre avrete in tempo reale la lista dei materiali occorrenti con relativi prezzi, in modo da poter gestire immediatamente sia l'ordine che il preventivo.

This is a software for wrought iron gates, pedestrian gates, railings, window grates, and banisters projects. With RIK-FER project one has the chance of choosing the best solution for him among the complete range of RIK-FER products. Moreover, one can immediately find the list of needed material with prices in order to manage both order and offer at the same time.

ORDINAZIONI

Per gli ordini degli elementi relativi ai cancelli serie 6000, alle scale serie 7000, alle inferriate serie 8000, ai cantonali serie 5000, possiamo ricevere richieste generiche.

Per esempio possiamo accettare ordini come questo "cancello art. 6000, con altezza minima 1500 mm, con altezza massima 1850 mm e con larghezza 3130 mm".

Rimaniamo però convinti che per un migliore risultato del lavoro sarebbe più opportuno che i nostri clienti si scegliessero gli articoli e si calcolassero le quantità, dopo aver disegnato su di un pavimento, o meglio, su di un cartone, in grandezza reale (scala 1:1), il lavoro da commissionare.

In questo modo siamo convinti che si possono ottenere i seguenti vantaggi:

- a) si riesce ad avere più chiare le proporzioni e la forma del lavoro che si vuole commissionare;
- b) nella fase di assemblaggio, si potrà utilizzare il disegno già fatto;
- c) si evitano errori e quindi ci sarà un risparmio di tempo e di denaro per tutti;
- d) si contribuisce sicuramente ad ottenere un migliore risultato finale.

- Gli articoli relativi ai profili battuti riportati a pagina 182 e 183 del nostro catalogo vengono forniti nelle lunghezze di 2000, 3000 e 6000 mm. Per misure diverse verrà calcolato un sovrapprezzo.

- Le altezze, le sezioni e gli ingombri dei nostri articoli base sono indicativi, pertanto non sono perfettamente uguali alle misure indicate nel catalogo e nemmeno perfettamente uguali fra loro. Resta chiaro così, che prima dell'uso, alcuni di loro devono essere leggermente sistemati.

- Su richiesta e su disegno in grandezza reale (oppure su campione) eseguiamo anche dei motivi diversi da quelli riportati sul presente catalogo.

NOVITÀ PER LE VERNICI

Con i nostri prodotti non più **quattro** trattamenti sulle pareti zincate (ancorante-vernice-patina-trasparente) bensì **due** (vernice e patina).

VERNICI

Ws-Plast-Dickschicht M 4200 non è una vernice, ma una plastica liquida ad adesione diretta su superfici zincate e in alluminio.

Trattamento: sulle superfici da verniciare non occorre alcun trattamento preliminare (Wash-primer, ecc.), però è necessario che le superfici stesse siano asciutte, senza olio e senza polvere. Pertanto prima di usare le vernici è necessario "lavare" con uno straccio le parti zincate da verniciare con diluente al nitro antinebbia oppure con uno sgrassante.

Resistenza: ha una resistenza elevata alla luce e alle intemperie.

Viscosità: essendo un materiale plastico non produce gocce.

Applicazione:

- a) con pennello senza diluire;
- b) con pistola ad aria, usando spruzzatori da mm 1,80-2,00 con una pressione di 3-4 bar e diluendo del 50 % con del diluente "Ws-Plast M V 751, ma anche con diluente al nitro antinebbia;
- c) con pistola elettrostatica regolandola a 500 Kohn;
- d) con pompa airless: compressione 1:30 e oltre, pressione d'ingresso 4-5 bar, pressione di spruzzo 120-150 bar circa, spruzzatore, di alesaggio di circa 0,38-0,66 mm;

Consumo: circa 150-200 g per mq per mano.

Tempi di asciugamento: 20 minuti; asciutto maneggiabile 2 ore circa.

Colori: nero forgia, grafite chiara, grafite scura, bianco, verde, marrone.

Confezioni: kg. 2,500 - kg. 11,00 - kg. 30,00.

PATINE

La **WS-Patina** è un materiale plastico semiliquido. Il suo contenuto solido è di circa il 70% rispetto al 40% dei normali colori convenzionali.

Pertanto costa di più ma rende molto di più. Esso non si compone di polvere metallica (che sbiadisce nel tempo) come le altre patine, ma di pigmenti di vetro tinti e annegati in materiale plastico liquido chiaro: pertanto "WS-Patina" conserva nel tempo la sua brillantezza iniziale.

Trattamento, Resistenza, Viscosità, Applicazione, Consumo e Tempi di asciugamento come per il "WS-Plast-Dickschicht M 4200".

Colori: argento, oro, verde, rame, verde.

Confezioni: argento e rame Kg 0,250 - Kg 0,750. Oro e verde solo Kg 0,250.

PATINATURA

La "patinatura" o applicazione di "Ws-Patina" si ottiene in questo modo:

- a) si mescola abbondantemente il prodotto con una piccola lama di ferro;
- b) si preleva una piccola quantità di "Ws-Patina" dal vaso e la si depona in un piccolo recipiente: funziona benissimo all'uso il coperchio del vaso adoperato;
- c) si prende un pennello morbido e si assorbono alcune quantità di patina deposte prima nel coperchio.
- d) si amalgama il pennello strofinandolo su di un panno in 2 o anche 3 punti diversi con moto circolare e si comincia a "patinare", cioè si comincia a pennellare dolcemente in senso contrario alle rigature del ferro battuto senza premere il pennello, in modo che risaltino le parti alte del materiale su quelle basse, creando così un contrasto di colori;
- e) si deve evitare al massimo, però, di provocare sul materiale delle strisce con pennellate forti;
- f) si ammorbidisce il pennello quando si asciuga e diventa duro con qualche goccia di diluente; però, prima di "patinare" di nuovo, bisogna far attenzione a strofinarlo ancora contro un panno, come si è detto prima, per non fare strisce.

PLACING ORDERS

We accept standard requests regarding orders for elements of the gate series 6000, the banisters series 7000, the window grate series 8000, and the corner banisters series 5000.

For example, we can accept orders like the one for this "gate art. 6000, 1500 mm minimum height, 1850 mm maximum height and 3130 mm width". Nevertheless, we are convinced that to obtain a better result it would be best if our customers would choose the articles themselves and calculate the quantities needed, after having made a full size (scale 1:1) design of the work to be commissioned on either the floor, or better yet, on cardboard.

We are convinced that by following the above indications the below listed advantages can be obtained:

- a) the proportions and forms of the work to be commissioned are much clearer;
- b) one can use the already existing design while assembling;
- c) one avoids errors and therefore everyone saves time and money;
- d) one definitely contributes to getting a better final result.

- The wrought profile articles shown on pages 182 and 183 of our catalog can be supplied at a length of 2000, 3000, and 6000 mm. There will be an additional charge for other sizes.

- The heights, the sections and the sizes of our standard articles are indicative and therefore are not always perfectly equal to the ones given in our catalog or when compared to one another. It is therefore clear that before use some may have to be slightly adjusted.

- On request, we also make motifs according to full size (scale 1:1) designs or samples that differ from those shown in our catalog.

NEW

With our products no more **four** treatments on the zinc-coated walls (primer-main painting, patination, transparent varnish) but only **two** (main painting and patination) are necessary.

PAINTS

Ws-Plast-Dickschicht M 4200 is not a paint, but a liquid plastic material, that adhere directly to zinc-coated and aluminium surfaces.

Treatment: no previous treatment (wash primer etc.) is required on the surfaces to be painted; however, the surfaces must be dry, and without oil or dust.

Resistance: high resistance to light and bad weather.

Viscosity: no drops, as it is a plastic material.

Application:

- a) with a brush, without diluting;
- b) air-pistol, using sprayers mm 1,80-2,00, pressure 3-4 bars with 50% dilution, with diluent Ws-Plast M V 751, but also with anti-fog nitro-diluent;
- c) electrostatic pistol, adjustment at 500 Kohms;
- d) airless-pump: compression 1/30 and more, entrance pressure 4-5 bars, spray pressure 120-150 bars abt., reaming sprayer of abt. 0,38-0,66 mm.

Consumption: abt. 150-200 g each m² per treatment.

Drying times: 20 minutes, workable dry-abt. 2 H.

Colours: smithy black, light graphite, dark graphite, white, green, brown.

Package: kg 2,500 - kg 11 - kg 30.

PATINA

The **WS-Patina** is a semi-liquid plastic material. Its solid content is abt. 70% against 40% of traditional colours. Therefore it costs more, but has a much higher performance. It is not made of metal dust (that fades away in the long run), like the other antiquing patinas, but of painted glass pigments soaked into light liquid plastic material. There "WS-Patina" durably keeps its initial brightness.

Treatment, Resistance, Viscosity, Application, Consumption,

Drying Times: same of "WS-Plast-Dickschicht M 4200".

Colours: silver, gold, copper, green.

Package: silver and copper 0,250 kg - 0,750 kg. Gold and green only 0,250 kg

PATINATION

Patination, that is the application of "WS-Patina", can be obtained as follows:

- a) the product must be plentifully mixed-up, with an iron blade.
- b) pick-up a small quantity of "WS-Patina" from the pot, and put it into a small vessel: for this the pot cover is sufficient.
- c) with a soft brush absorb a quantity of patina after putting it on the cover;
- d) amalgamate the brush by rubbing it against a glove, then start "patinating" (brushing) softly, without brush pressure, thus causing the higher parts to stand out on the lower ones, with a colour contrast.
- e) avoid, as much as possible, any paint streaks produced on the material with sharp brushing.
- f) the brush, at drying, must be softened with some drops of diluent; be careful at any rate to rub the brush again, against an object avoiding any streaks.

| Rosoni con ricci a "scalpello" / Rosettes with "chisel-like" scrolls | pag. 290 (238-299-396-397); 291 (243) |
| Rosoni con ricci #12x6 e #10x5 a "vite" / Panels with #12x6 e #10x5 "Screw-like" twisted scrolls | pag. 236 (214-215) |
| Rosoni fascettati o saldati, #8, Ø 10, #12, #12x5, #10x5, #16x4, #20x4, #20x5, #30x5 / Panels, clipped and welded, #8, Ø 10, #12, #12x5, #10x5, #16x4, #20x4, #20x5, #30x5 | pag. 223-237 (263); 223-237 (264); 237 (262); 237-238 (265); 238 (260-261-266) |
| Ruote in ferro, ruote in inox / Steel wheels and stainless steel wheels | pag. 314 (379); 316-317 (384) |
| Serrature / Lockers | pag. 209 (195); 315 (381) |
| Segnavento / Weather vanes | pag. 309 (635) |
| Sfere in ottone / Brass spheres | pag. 313 (276) |
| Sfere lisce / Smooth spheres | pag. 260 (272-549) |
| Sfere forgiate / Forged spheres | pag. 260 (271-550) |
| Segni zodiacali / Zodiacal signs | pag. 309 (316) |
| Sfere rigate / Ribbed spheres | pag. 259 (443) |
| Sfere cave e 1/2 sfere / Hollow spheres and hemispheres | pag. 260 (549) |
| Sfere diamantate / Hammered spheres | pag. 260 (549) |
| Spirali / Spirals | pag. 232 (303) |
| Stampati in #20x4 / Press-forged bars in #20x4 | pag. 239 (257-258) |
| Supporti e placche / Support brackets and shoes | pag. 206 (190-191-313-420) |
| Supporti e terminali in ottone / Brass brackets and endings | pag. 312 (277); 314 (636) |
| Terminali per scale e cancelli / Gate and newel post endings | pag. 198 (186); 198-199 (184); 198-199 (185); 199 (191-217-229-252-294-392); 200 (236-267-436-437-542-543); 201 (548); 269 (592) |
| Teste di animali in ghisa e in ferro / Cast iron and steel animal heads | pag. 255 (291); 267 (278) |
| Tubi conici / Conical tubes | pag. 254 (282) |
| Uva: foglie, pannelli, grappoli / Vine: leaves, panels and grapes | pag. 279-282-283 (529); 280 (525-526); 281 (527-528); 282 (290-438-439-531); 283 (530) |
| Vetrini e ceramica / Glass and porcelain accessories | pag. 313 (387) |
| Viti speciali / Special screws | pag. 208 (420) |
| Vite antifurto / Antitheft screws | pag. 159 (195) |
| Viti per legno / Screws to be used on wood | pag. 201 (550) |
| Viti per muro / Screws to be used on wall | pag. 208 (196) |

Il numero delle pagine scritte in grassetto si riferiscono al catalogo RIASSUNTIVO GENERALE, mentre il numero delle pagine scritte in corsivo e poste tra parentesi si riferiscono:

da 1 a 316 al catalogo GENERALE;

da 317 a 452 al catalogo RIK-FER 2000;

da 453 a 644 al catalogo RIK-FER 2005;

Please note: all pages printed with bold numbers are referred to the ABRIDGED CATALOGUE, whilst all numbers of pages in cursive writing and in brackets are referred to:

from page 1 to 316 to our GENERAL catalogue;

from page 317 to 452 to our catalogue 2000;

from page 453 to 644 to our catalogue 2005;
